- 1 A. If you go into add-ons and search for Video Download Helper
- 2 or video download and then pick it out of the store and download
- 3 it, then you take those steps, sure.
- 4 Q. Okay. Then you are going to get it and then it is going to
- 5 automatically download a copy into that folder?
- 6 A. No, sir, it is not automatic. You have to tell it you want
- 7 to download the video.
- 8 Q. When the user downloads a video, does the video go somewhere
- 9 else too? Is it copied to somewhere else?
- 10 A. Do you mean is it cached?
- 11 Q. Never mind that line of questioning. Let me ask you a few
- 12 different questions. You notice the individual in 2M appears to
- 13 be wearing a bra?
- 14 A. Yes, I did notice that, sir.
- 15 Q. Is that what would typically be known as a [REDACTED]?
- 16 A. I don't know that wearing a bra is the only -- again, I
- 17 can't testify to that. I am a visual forensics expert, not an
- 18 expert on human sexuality.
- 19 Q. Well, you have some expertise in pornography though and --
- 20 A. Thank you.
- 21 Q. Is that right?
- 22 A. I have seen -- I have seen a lot of pornographic videos, a
- 23 lot of images. I have seen videos that -- that are labeled
- 24 [REDACTED], sure.
- 25 Q. All right. And it's not -- [REDACTED] is a fairly common term

## zero.scalpel.fuse.pl

FUSE driver in Perl for reading scalpel's audit.txt file and showing a file system that maps files it would have carved to a disk image -- this allows for zero-storage carving as you can browse and view files with only a 'scalpel -p' (preview, scalpel writes no files) -- tested under Ubuntu Linux 18.04

Useful for me anyway, maybe not for you, but if so then enjoy.
